ultramicroscopy

Subject index to volume 59

Auger and secondary electron spectroscopy
Quantitative surface chemical mapping with Auger and backscattered electron signals, *Prutton, Barkshire and Crone* 59 (1995) 47

Convergent beam electron diffraction (CBED)
Energy-filtered convergent-beam diffraction: examples and future prospects, *Midgley, Saunders, Vincent and Steeds* 59 (1995) 1

Cryomicroscopic methods
Cryo-electron energy loss spectroscopy: observations on vitrified hydrated specimens and radiation damage, *Leapman and Sun* 59 (1995) 71

Data processing / image processing
Analyzing line scan EELS data with neural pattern recognition, *Gatts, Duscher, Müllejans and Rühle* 59 (1995) 229

Editorials, Announcements, Comments, Reports, Historical notes
Foreword to EELSI 94, *Krivanek and Stadelmann* 59 (1995) ix

Electron diffraction
Momentum dependent energy loss near edge structures using a CTEM: the reliability of the methods available, *Botton, Boothroyd and Stobbs* 59 (1995) 93
Momentum-transfer resolved electron energy loss spectroscopy of solids: problems, solutions and applications, *Wang, Cheng, Dravid and Zhang* 59 (1995) 109

Electron energy loss spectroscopy (EELS)
Conduction bandstructure in strained silicon by spatially resolved electron energy loss spectroscopy, *Batson* 59 (1995) 63
Cryo-electron energy loss spectroscopy: observations on vitrified hydrated specimens and radiation damage, *Leapman and Sun* 59 (1995) 71
Modelling the bonding at metal–ceramic interfaces using PEELS in the STEM, *Brydson, Bruley, Müllejans, Scheu and Rühle* 59 (1995) 81
Momentum dependent energy loss near edge structures using a CTEM: the reliability of the methods available, *Botton, Boothroyd and Stobbs* 59 (1995) 93
Momentum-transfer resolved electron energy loss spectroscopy of solids: problems, solutions and applications, *Wang, Cheng, Dravid and Zhang* 59 (1995) 109
Simulation of the extended fine structure of K-shell edges in intermetallic ordered alloys, *Hug, Blanche, Jaouen, Flank and Rehr* 59 (1995) 121
Development of the EXELFS technique for high accuracy structural information, *Qian, Sarikaya and Stern* 59 (1995) 137
High spatial resolution extended energy loss fine structure investigations of silicon dioxide compounds, *Yuan, Csillag, Tafreshi and Colliex* 59 (1995) 149
Some practical consequences of the Lorentzian angular distribution of inelastic scattering, *Egerton and Wong* 59 (1995) 169
The influence of plural scattering on EELS elemental analysis, *Su, Wang and Zeitler* 59 (1995) 181
The resolution limit for elemental mapping in energy-filtering transmission electron microscopy, *Kohl and Berger* 59 (1995) 191
A quantitative approach for spatially-resolved electron energy-loss spectroscopy of grain boundaries and planar defects on a subnanometer scale, *Gu, Ceh, Stemmer, Müllejans and Rühle* 59 (1995) 215
Analyzing line scan EELS data with neural pattern recognition, *Gatts, Duscher, Müllejans and Rühle* 59 (1995) 229
Progress in electron Compton scattering, *Schattschneider and Exner* 59 (1995) 241

Elsevier Science B.V.

Electron microscope design and characterization
Measurement of TEM primary energy with an electron energy-loss spectrometer, *Meyer, Boothroyd, Gubbens and Krivanek* 59 (1995) 283

Energy-filtered imaging and diffraction
Energy-filtered convergent-beam diffraction: examples and future prospects, *Midgley, Saunders, Vincent and Steeds* 59 (1995) 1
Imaging of nanometer-sized precipitates in solids by electron spectroscopic imaging, *Hofer, Warbichler and Grogger* 59 (1995) 15
Energy-filtered transmission electron microscopy of Si_mGe_n superlattices and Si–Ge heterostructures. I. Experimental results, *Jäger and Mayer* 59 (1995) 33
The resolution limit for elemental mapping in energy-filtering transmission electron microscopy, *Kohl and Berger* 59 (1995) 191

Inelastic electron scattering theory
Simulation of the extended fine structure of K-shell edges in intermetallic ordered alloys, *Hug, Blanche, Jaouen, Flank and Rehr* 59 (1995) 121
Review of methods for calculating near edge structure, *Rez, Bruley, Brohan, Payne and Garvie* 59 (1995) 159
Some practical consequences of the Lorentzian angular distribution of inelastic scattering, *Egerton and Wong* 59 (1995) 169
Delocalization in inelastic scattering, *Muller and Silcox* 59 (1995) 195
Progress in electron Compton scattering, *Schattschneider and Exner* 59 (1995) 241

Microscopic methods, specifically for catalysts and small particles
Imaging of nanometer-sized precipitates in solids by electron spectroscopic imaging, *Hofer, Warbichler and Grogger* 59 (1995) 15

Microscopic methods, specifically for solid interfaces and multilayers
Energy-filtered transmission electron microscopy of Si_mGe_n superlattices and Si–Ge heterostructures. I. Experimental results, *Jäger and Mayer* 59 (1995) 33
Modelling the bonding at metal–ceramic interfaces using PEELS in the STEM, *Brydson, Bruley, Müllejans, Scheu and Rühle* 59 (1995) 81
A quantitative approach for spatially-resolved electron energy-loss spectroscopy of grain boundaries and planar defects on a subnanometer scale, *Gu, Ceh, Stemmer, Müllejans and Rühle* 59 (1995) 215

Microscopic methods, specifically for surfaces
Quantitative surface chemical mapping with Auger and backscattered electron signals, *Prutton, Barkshire and Crone* 59 (1995) 47

Scanning electron microscopy (SEM)
Quantitative surface chemical mapping with Auger and backscattered electron signals, *Prutton, Barkshire and Crone* 59 (1995) 47

Spectrometers
An imaging filter for high voltage electron microscopy, *Gubbens, Kraus, Krivanek and Mooney* 59 (1995) 255
An imaging filter for biological applications, *Krivanek, Friedman, Gubbens and Kraus* 59 (1995) 267
